

Caldera  
**TextilePro**

A workflow suite for quick, precise and profitable textile printing

Caldera's intuitive production suite for textiles gives design, color, ink and substrate control at the touch of a button, allowing textile producers to create patterns and variations without error and waste.

TextilePro helps inkjet textile printers to have control over their colors all along their production workflow

**COLOR MANAGEMENT**

Caldera's Print&Cut packages include an easy and powerful color management solution: EasyMedia. This step-by-step wizard will help you reproduce colors consistently across all your print configurations and on any type of media.

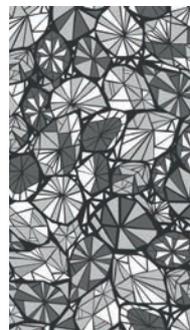

**ATTAIN COLOR CONSISTENCY ACROSS YOUR OUTPUT**

- Calibrate your devices and ink use
- Download color profiles for free from our online library
- Create your own ICC profiles
- Access to popular spot color libraries (Pantone, RAL, HKS, ...)

**RGB WORKFLOW**

TextilePro keeps all colors in RGB to guarantee full fidelity to the original. Fashion users can take advantage of a choice of generation methods for blacks to achieve the richness and texture they desire for their design, while also having full control over spot color and N-color management.

Without RGB Workflow

With RGB Workflow

**COLORBOOKS**

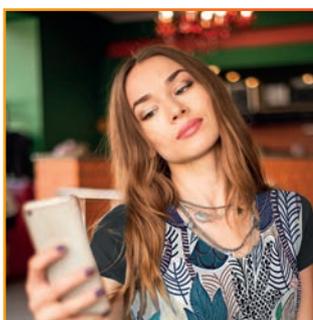

TextilePro has a wide range of colorbooks incorporated for ensuring spot colors are consistent from design to final production. It also allows you to create custom ink sets and to calculate and vary ink laydown to ensure vibrant, accurate images no matter what the fabric.

**PATTERN REPETITION**

Creating repeatable, aligned patterns is child's play with TextilePro, thanks to the inclusion of Caldera's existing Tex&Repeat module which works in tandem with the Photoshop plug-in for colorizing patterns and swapping swatches quickly.

**PRINTBLEED**

This bleed management module is very useful when you need to create value-added, non-rectangular applications. In these cases, the last thing you want is white borders along the cutting edges. TextilePro calculates and enables printing to the full bleed of the media surface for perfect results.

For Fashion

For Sportswear

For Home Decor

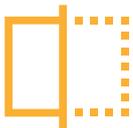

For Soft Signage

## Caldera TextilePro

### Key features of Version 13

#### Print&Cut Mirror

For dye sublimation and backlit printing, this new feature will save up to 20% of prepress time by allowing you to mirror print and cut data directly in the RIP.

#### TileOrder

You can now adapt the order in which you print tiles to achieve significant onsite time savings during large tiling jobs, blueback and building wrapping.

#### CalderaJobs - Detailed View

Save time by managing a clean view of your past jobs. Archive, save or delete jobs while keeping track of production with a new, faster search engine and detailed job view.

#### Custom Annotations

This allows users to customise the information they include in annotations rather than the legacy Caldera standard or detailed information, saving space on media and allowing for circumstances when you can't use a barcode or qr code reader.

#### Alpha-to-Spot

Save up to 60% of prepress time by automatically converting transparent backgrounds to spot channels.

#### Adobe Textile Designer Integration

Gives you the ability to design with confidence and print with accuracy, using a single streamlined process for accurate textile print production. You'll be assured accurate pattern repeatability, with correct and consistent color management across all devices.

### DISCOVER OUR BEST-SELLING OPTIONS

#### CUSTOM INKSET

This module lets you create and manage customizable configurations for ink. Insert your cartridges, choose which ones will be used in the mixes (process inks) and which will be handled separately (spot inks).

#### HARDWARE ACCELERATION

Hardware acceleration lets you take advantage of your computer's full capacity to speed up RIP and print times. Thanks to the OpenCL™ technology, all central processing units (CPU) and graphics cards (GPU) are in sync with your production.

#### SYSTEM REQUIREMENTS

Caldera's solutions are Linux and Mac based. Take advantage from these operating systems developed for performance and reliability (Debian GNU/Linux) and from the designers' preferred and secure platform (MacOSX). Mac and Linux, your best choice for optimal resource management and quality workflow. Caldera also proposes Dell PC solutions adapted to your production needs, with our RIP already installed and ready to be used. Ask your reseller for Caldera-Dell stations to check which solution suits you best.
