# CalderaRIP
Version 16

CALDERA

Caldera
GrandRIP+

## Print&Cut software package built for Industrial Printing applications

- **Unifies workflow from prepress to print & cut tasks**
- **Ensures reliable color reproduction**
- **Automates tasks**
- **Increases your performance**

For grand-format, high-production and multiple device environments

CLIENT-SERVER ARCHITECTURE

Purchase one main license and share it with all computers (Mac and Linux) in your network. A Client computer requests different devices in your network to compute jobs, while a Server computer executes the requests. Add as many Clients and Servers as you need to drive an unlimited number of devices.

Client for A, B and C
Server for A and B

Server for C

A — Printer
B — Cutter
C — Printer

UNIFY YOUR PRODUCTION

- One single platform to control your production, updates and configurations
- Better throughput and color homogeneity
- One update for all your machines
- Reduced training time

COLOR MANAGEMENT

Caldera's Print&Cut packages include an easy and powerful color management solution: EasyMedia. This step-by-step wizard will help you reproduce colors consistently across all your print configurations and on any type of media.

ATTAIN COLOR CONSISTENCY ACROSS YOUR OUTPUT

- Calibrate your devices and ink use
- Download color profiles for free from our online library
- Create your own ICC profiles
- Access to popular spot color libraries (Pantone, RAL, HKS, ...)

HIGH PERFORMANCE

GrandRIP+ integrates the Open Computing Language (OpenCL) technology which allows the simultaneous use of multi-core CPUs and GPUs. Take full advantage from all your resources and produce more while reducing your hardware needs.

BOOST YOUR PRINT PROCESS

- Faster image processing
- Improve your hardware profitability (ROI)
- Optimize the use of your resources
- Caldera Rack Server for more reliability

MULTI-LEVEL AUTOMATION

From automatic recognition of shapes when nesting to preset configurations for quicker submission of jobs to the printer, GrandRIP+ gives you a complete automation tool box. Thanks to this, you will have more time for other tasks.
GAIN TIME AND PRODUCTIVITY

- Create your own production workflows
- Benefit from hotfolders
- Send jobs to print in a couple clicks
- JDF/JMF communication with Nexio (option)

For Industrial Printing

For Packaging

For Grand and Super-Wide Signage

Caldera
GrandRIP+

New Version 16 features

Adobe PDF Print Engine 6

Use the new Editor interface in GrandCut to create, edit and select materials. Associate methods and materials to increase the precision of your large-format cutting devices.

PDF MultiPage & Cut

Have several projects with different cut contours? Group them in multi-page PDF files and submit them to CalderaRIP. Handling fewer files guarantees a more efficient workflow.

VisualCut MultiPass

Instead of re-cutting the same job multiple times, define a number of Passes in VisualCut to save time & achieve higher cutting precision on thicker materials.

CalderaCare features of V16

SmartImport

Save time & avoid manual errors! SmartImport automatically extracts metadata from the filename (copies, printer, presets, height, width, scale) to automate job submission.

PrintProof

Improve your customer validation workflow! Export TIFF proofs of your jobs after ripping and send them to your customers to avoid unwanted waste.

DISCOVER OUR BEST-SELLING OPTIONS

INKPERFORMER

For each job, the best combination of inks is calculated in order to reduce the overall quantity of ink used while maintaining the quality of your prints. Reducing the amount of ink used allows faster drying time and cuts down on production costs.

HARDWARE ACCELERATION

Hardware acceleration lets you take advantage of your computer's full capacity to speed up RIP and print times. Thanks to the OpenCL™ technology, all central processing units (CPU) and graphics cards (GPU) are in sync with your production.
