FlexiPRINT

HP PREMIUM EDITION

for HP 300 & 500 Series and more.

\$1295
for
**HP 300
& 500**

**The industry's easiest and most complete
print and cut workflow**

FEATURE SPOTLIGHTS

All-in-One Print-and-Cut Workflow

Enjoy the industry's most seamless print-and-cut workflow with stunning accuracy and an easy-to-use interface. Effortlessly design multiple contour cut lines in any vector or bitmap design and create accurate print-and-cut jobs in the fewest steps and from a single application. SAI Flexi supports over 1,000 cutters with automatic and/or manual crop mark detection. Also nest print-and-cut jobs together to save media or tile oversized jobs into smaller panels that your devices can handle.

Better Than Any Plug-in

From stickers and labels to custom-cut wall coverings and POP signage, there's no easier way than FlexiPRINT to produce print-and-cut products. Create complex contour cut paths with the click of a button, automatically set correct margins and registration marks and create both the print and the cut file in one go. Use Automatic Tiling to quickly produce giant print-and-cut jobs or reduce your media cost and RIP processing time by nesting multiple copies in the RIP.

TOP FEATURES

- Highest level HP certification
- Automatic media synchronization
- Double-sided printing
- Full color correction toolset
- PANTONE® and custom spot color matching
- Fast, native PDF RIP engine
- Easy Print Wizard
- Fast job preview
- Full free-form job tiling
- Cloud tools and HP videos
- Full margin, bleed and crop marks
- Print from any application
- HP WallArt integration
- Free companion mobile app
- Optional banner finishing tools

HP Integrated Media Library Tool

Take full advantage of the new HP Latex printer capabilities thanks to Flexi's close integration with HP's online Media Library. View and download the latest media and print modes directly to your printer, which auto-synchronize with Flexi to get you up and running quickly.

Manual & Automated Job Nesting

Flexi's automated Job Nesting optimizes your device and media usage by grouping multiple print jobs into one job before printing. Take total control using Flexi's manual layout tool to quickly nest multiple print jobs or multiple pages, copies, tiles or separation of the same job.

Faster, Easier Weeding

Nothing is more frustrating than weeding print-and-cut jobs that have imperfect contour cut paths and cause tearing or the need to hand cut during weeding. FlexiPRINT eliminates these problems, with automatic cut path lines that make weeding faster, and overcut lines that assure all cuts are complete.

Easy, Accurate Spot Color Matching

Quickly and accurately map spot colors in the design file to exact output values to have your printer match the desired output color for each new job. Using Custom Spot Color Matching you can easily build your own custom library of spot colours ensuring you always print spot colors exactly as they should be printed.
