KODAK PROFESSIONAL

Inkjet Smooth Fine Art Paper, 315gsm

Properties	Specifications
Material	Smooth, 100% acid free base paper
Gauge	310 +/-7.5% Microns
Whiteness	110 +/-5
Printer/Ink Compatibility	Dye/pigment
Software Setting	The coating on this product is engineered for better than 300% ink coverage. A heavy-weight coated, or Enhanced Matte paper setting is the appropriate starting point. However, we recommend that you try different settings to achieve optimum performance for your specific application.
Light Fastness	The fading time of inkjet ink is a direct result of the inks that you choose to use and the environment where the print is displayed. Contact the ink manufacturer for light-fastness data.
Finishing/Post Processing	No post processing or finishing is required. A clear fixative may be applied to enhance certain areas of the print. We recommend waiting 24 hours before placing the print behind glass.
Handling Recommendations	Due to the absorptive nature of the coating, you should avoid touching the coated surface. It's always recommended that cotton gloves be used when handling inkjet coated materials. Rolls of Kodak film are supplied with the coated side facing out.
Ideal Storage Conditions	70° F (21° C), 50% R.H. (a controlled environment is recommended); store in original packaging.
Shelf Life	1 year from the BMG ship date when stored in proper conditions.
